DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,944,429 to Bishop et al.

Bishop shows a dispenser head 12, an inner body 36 fix to a dispensing device in a non-removable manner and having a shoulder as seen in Fig. 1, a separate outer body 22 fix to the inner body in a removable manner. The outer body defines an actuating surface 54, a frustoconical section, fixing means and a cap 24.

Allowable Subject Matter

3. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed November 26, 2003 have been fully considered but they are not persuasive. The inner body of the device of Bishop is mounted to the dispensing device in a non-removable manner as can be seen in Fig. 1, the screw cap supporting the dispensing assembly can be removable mounted on a container not the inner body.
